

Why Are My Yellow Begonia Flowers Are Turning Brown?

Why Are My Yellow Begonia Flowers Are Turning Brown? Hello plant lovers, welcome to another article about plants.

Today in this topic we are going to talk about why your Begonias turn brown and die and what to do about it.

Begonias

There are over 2,000 species of Begonias with a wide range of leaf size and color, no from small to really big blooms covering every color of the rainbow.

They are popular for outdoor gardens and a very good choice for indoor pots as they are generally sturdy plants.

They provide amazing beauty for those who know how to take care of them and know how to keep them safe and prevent them from dying.

Why my Begonia leaves turning yellow?

If your Begonias turning their colors to brown, it might be one of the reasons below and if you take care of these problems and solve them your plant will come back to life.

- Watering
- Sunlight
- Soil
- Fertilization

You need to fertilize your Begonias regularly to keep the plant healthy, the foliage green and the blooms big and colorful.

It is not recommended to use chemical fertilizers that are high in salt which it can damage your plant`s roots.

A good fertilizer has good amount of nitrogen, phosphorous and potassium and that is water-soluble for flowering plants.

Hope this article helped you a bit and if you have anything more to add to this article, feel free to share your own experience and let us know more.
